In view of the action which follows herein, prosecution is hereby re-instated, and the Office Action dated March 27, 2001 is vacated.

Claims 13-17 and 33-38 remain in this application.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 13-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 13, line 2, the word “~~dog~~” should be ~~-dogs-~~. Also, the holes, per se, do not form engagement surfaces.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “modular assembly” and the “means for retaining the modular assembly in position” (see claims 16 and 17) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

In regard to the above, the specification is insufficiently clear to enable clear comprehension of the physical relationships of the modular assembly, the coupling assembly and the flitch table. The offering at page 26, lines 12-21, when taken with figure 22, fail to reasonably clarify the physical nexus of the various elements.

Art Unit: 3725

Claims 13-17 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 33-38 are allowed.
